

The background is a complex abstract composition. It features several hands in various shades of orange, pink, and brown, some reaching out or holding. These are overlaid with a dense pattern of overlapping geometric shapes, including circles, triangles, and polygons, in a wide range of colors from deep blues and greens to warm oranges and yellows. The overall effect is a rich, textured collage that suggests themes of human connection and emotional depth.

1ST PROJECT BY WOOD TAILORS CLUB

TROPICAE BISTRÔ

Embellished the architecture with arches, neutral palette colors came together with baby blue color appointments, and subtle tropical vibes to grace this commercial décor space.

The designer used a custom design of Peggy Sofa to surround the concave shape of the walls. All over the space, you'll find out some of the highlighted pieces of Wood Tailors Club's collection, where the exquisite handcraft is pretty clear.

ARTISTIC *TECHNIQUES*

*"...artisans use
their hands
to apply
this technique..."*

HAND PAINTING

This two-dimensional art resorts to different techniques with different kinds of paint made of different pigments. For a fully personalized work, where no piece's details resemble the others, artisans use their hands to apply this technique, swiping the brush with their own flow and tact.

METAL WORKING

Act of forging metal through methods like casting, hammering and spinning. To get moldable, metal is heated to high temperatures and handled with specific tools that allow the artisans to create the desired shapes.

SCULPTING

Just like metalworking, sculpting is the art of changing the shape of materials such as stone, metal, glass, pottery and wood. Having an extremely tactile component given the conception of textures, relief and volume, it represents a technique born in the prehistoric period.

LEAF GILDING

Gold Gilding is an appliance of a leaf-like thin coat of metal on top of solid wood surfaces.

These surfaces must be, first and foremost, impeccably prepared with a primer. Once the surface is primed, the artisans place carefully the gold, silver or copper leaf and start the leaf beating with a paint-brush by hand.

This technique is thousands of years old and has the ability to transform even the duller pieces into something breathtakingly beautiful.

WOOD CARVING

Is one of the most common practices in sculpting. Very subtle details can be carved in wood by using a variety of razor-sharp tools, from gouges to saws. The hands of the woodcrafters must exert the appropriate force so the wood is not damaged, which requires the mastery of this art.
